Subject index

A

Acetazolamide 632
Acetylcholine 7, 213, 652
– receptors 385, 586
Acidification 639
Action potential 230, 339, 704
– – clamp 230
Activation kinetics 339
– of K^+ and Cl^- conductance 710
A current 130
Adenosine triphosphate 144
Adenylate cyclase 80
ADP-stimulated platelets 68
Adrenalectomy 573
Adrenergic nerves 667
α-Adrenoceptors 667
Aequorin luminescence 219
After-hyperpolarization 704
Alanine 434
Aldosterone 526, 533, 540, 573, 632
– action 62
4-Aminopyridine 130,151
Amiloride 62, 88, 180, 254, 312, 335, 533, 639, 715
–-sensitive Na^+ transport 481
Amphiuma diluting segment 422
Anaerobic metabolism 434
Anesthesia 74
Anesthetic agent 375
Angiotensin II 673
Anion conductance 53
– exchange 632
– selectivity 413
Anoxia 144, 207
Anterior 120
– pituitary 120
Anthracence-9-carboxylic acid 17
Antinociception 222
Aortic smooth muscle 742
AP shortening 207
Apamin 704
Apical H^+/K^+ pump 540
– Na^+ channels 62
Artery cells 462
ATP 189, 305
ATP-sensitive K^+ channels 568
ATPase activity 512
Atrial muscarinic K^+ channels 213
– natriuretic peptide 519
Atropine 561
AtT-20 cells 120
Autonomic nervous system 225
Autoregulation 442, 548

B

Barium 262, 360
Basal metabolism 406
Basolateral membrane 448
– – voltage 715
– transport 624
Batrachotoxin (BTX) 360
Bay K 8644 151
Bicarbonate secretion 652
– transport 312
Birefringence 679
Blood flow 477
– gas composition 580
Boltzmann's equation 594
Bradykinin 305
Brain 594, 604
BRL 34915 305
Brown adipose tissue 659, 663
Bulbospinal 5-HT pathway 604
Bumetanide 68
Butanedione monoxime 219

C

Ca-dependent K current 322
Ca channels 170
Ca current 170, 189, 207
Ca permeability 609
Ca^{2+}-activated K^+ channel 704
Ca^{2+} influx 704
Ca^{2+} 130, 254
Ca^{2+}-dependent Cl channel 7
Ca^{2+}-dependent K^+ current 106
Ca^{2+}-sensitive K^+ channels 568
Ca^{2+} and H^+ interaction 501
Ca^{2+} channel current 151
Ca^{2+} channels 561
Ca^{2+} currents 210
Ca^{2+} influx 43
Ca^{2+} mobilization 36
Ca^{2+} pumps 406
Ca^{2+} release 106
Ca^{2+}/force relationship 28
Cadmium 98
Caffeine 230, 462
– sensitive outward current 467
Calcium 1, 36, 360, 406
Calcium-activated chloride conductance 1
–-activated potassium channels 422
Calcium channel 462
Calcium channel effectors 586
Calcium channels 210, 281, 296
Calcium channel(s) 98
– current inactivation 368
– influx 305
– measurement 281
– release 230, 296
Calmodulin 36, 512
Calmodulin (CaM) antagonist 36
cAMP 189
Capillary density 477
Carbachol 28, 351, Carbamylcholine 519
Carbonic anhydrase 540
Cardiac cells 189, 766
Cardiac metabolism 673
– muscarinic K^+ channel 216
Cardiac muscle 219, 398
– myocytes 196
– Na^+ channel 493
Cardiocytes 207
Cardiomyocyte 94
Cardiovascular response 222
Cation channel 609
Cd^{2+} 130
Cell calcium 561
– culture 98, 201
– electrolyte concentrations 88
– line 120
– membrane fragility 144
– – potential 722
– – resistance 722
– shortening 94
– volume regulation 448
Cellular cytotoxicity 413
– suspensions 615
Cerebral neurons 454
Channel blockade 750
– kinetics 385
– state 398
Chemoreceptor 247
Chemosensitivity 735
– to PCO_2 pH 735
Chloramine-T 393
Chloride absorption 632
– channel 413
– channels 17
– conductance 1, 288
– transport 53
Chlorophenylthioadenosine cyclic 3',5'-monophosphate 254
Cholecystokinin 652
Cholinergic agonists 561
Cl channel 454
Cl channels 413
Cl permeability 312
Cl^--HCO_3^- exchange pathways 632
Cl^-conductance 710
Cl^- channels 533
Cl^- conductance 180
Cl^-/HCO_3^- exchanger 270
Closing rates 360
CO_2-chemoreceptors 580
Co^{2+} 130
$CoCl_2$ microinjection 735
Cold-acclimated rats 659
–-induced thermogenesis 659, 663
– exposure 663
Collecting duct 180
– tubules 561
Colon 639
Conductance 481
Connecting tubule 254
ω-Conotoxin 170
Contractile properties 17
– proteins 512
Contraction 351
Contraction-relaxation cycle 28, 512
Contracture 434
Coronary artery 442
Cortical collecting duct 88
– collecting tubules 694
Cortisol 180
Creatine 434
– phosphate 22
Cross-bridge theory 113
Crossbridge 679
Cultured chick cerebral neurons 454
– epithelial cells 710
– renal (A6) epithelium 481
Cutaneous sympathetic activity 225
Cyclic AMP 312
– guanosine monophosphate 519
Cytoplasmic enzymes 144
Cytosolic alkalinization 68

– Ca^{2+} level 351
– free Ca^{2+} 710

D

D_2 receptors 473
Decerebrate dogs 580
Deoxycorticosterone acetate 180, 548
2-Deoxyglucose 477
Depolarisation 422, 612
Depolarization 493
Desensitization 7, 586
Diabetes insidipus 694
DIDS 68, 533
Differentiation 526
– of PC12 cells 368
Diffraction ellipsometry 679
Digitals toxicity 766
Dihydropyridines 170
5,7-Dihydroxytryptamine 604
Distal bright convoluted tubule 270
– colon 632, 639
Divalent cations 360
Dome formation 526
Dopamine 473

E

EDRF release 305
EGTA 462
Electro-optical recording system 201
Electrolyte concentrations 335
– microprobe analysis 335
– microprobe analysis 53, 88
Endothelial cells 609
Endurance training 470
Energy state of myocardium 434
Enzyme release 144
Epithelium 62, 312
Ethylisopropylamiloride (EIPA) 68
Excitation/contraction coupling 98, 296, 742
Extra-cellular pH 247
– potassium 406

F

Feline kidney 80
Fever 225
Fibre type 689
Field stimulation 667
Fluctuation analysis 493
Fluorometry 715
FMRFamide 612
Force-length relations 113
Force development 28
– regulation smooth muscle 742
Forskolin 351
Frequency-dependent block 398
Frog skeletal muscle 238
– skin 53, 335
Fura-2 28, 561, 652, 727
Fura-2 analysis 43
Furosemide 422

G

G Nucleotides 213
G Protein 213
GABA 454
$GABA_A$-receptor agonist muscimol 454
$GABA_B$ receptors 473
Gallbladder epithelium 312
Gamma-aminobutyric acid 454
Gating current 162
Glioma hybrid cells 130
Glomerular filtration rate 74, 548
Glomeruli 519
Glucocorticoid substitution 573
Glucoregulation 604
Glucose 568
– utilization 477
Glycogen metabolism 673
Growth cone 368
GTP 216

H

Halothane 375
HCO_3^- conductance 180
HCO_3^-/Cl^- exchange 68
H^+-K^+ exchange pathways 632
Heart 189
– arrest 144
– cells 201
Heart pacemaker 339
Heat production 219
– rate 406
HeLa cells 43
Helix neurones 612
Histamin 609
H^+-K^+ pump 540
H^+ ionophore 138
Human epithelial cells 710
– platelets 68
– skeletal muscle 113, 470, 689
– T lymphocytes 413
– vascular endothelial cells 609
Hydroosmotic response 694
Hyperaldosteronism 639
Hypercapnia 580
Hypercapnia 247
Hyperglycaemia 604
Hyperpolarization 339, 710
Hyperpolarizing pre-pulses 322
– pulses 339
Hypertension 673
Hypothyroidism 663
Hypoxia 247

I

I_f current 339
Image analysis 270
Immobilization atrophy 126
Inactivation 1, 467
– delay 493
Indo-1 305
Indomethacin 722
Inner ear 262
– medullary collecting duct 715
Inositol 1,4,5-triphosphate 7
– triphosphate 296
Input resistance 375
Intercalated cells 533, 540
– –, renal 88
Interleukin-1 225
Internal Ca^{2+} oscillations 43
– Ca^{2+} pumps 406
– pH 43
Intestinal absorption 632, 639
Intracellular Ca^{2+} concentration 704
– calcium 652
– electrolyte concentrations 53
Intracellular free calcium 305, 501, 727
– – magnesium 238
– GTP 216
– ions 196
– magnesium 238
– Na^+ 422
Intracellular pH 138, 270, 501
– – regulation 715
Intracellular sodium 238
Iodoantipyrine 477
Ion-selective microelectrodes 196, 238
– channel 612
– channels 360, 646
Ionic currents 230
Ischemic heart 434
Isoguvacine 454
3-Isobutyl-1-methylxanthine (IBMX) 462
Isolated cardiocytes 207
– cells 339
– renal tubule 88
– smooth muscle cells 151
– substantia nigra neurones 473
– tubule 694
Isometric force 727
Isoprenaline 351
Isotonic cell shortening 94

J

Juxtaglomerular cells 281

K

K-dependent chloride absorption 632
K absorption 573
K channel 393
K current 207, 322
K secretion 573
K^+ channel 704
K^+ conductance 710
K^+ current 766
Kidney 80, 254, 422, 519
– cell 138
– cells 526, 533, 540, 554, 615, 624
Kidney cells 615
– (OK)-cell monolayers 624
– proximal tubules 74
– slices 281
K^+-current 467
K^+ channel 216, 568
K^+ channel blockers 130, 138
K^+ channels 213
K^+ conductance 180
K^+ current 106
K^+ current 151
K^+ depolarization 28

L

La^{3+} 43
Late slow outward current 322
Ligand-gated ion channel 612
Lipid bilayers 360
Lipopolysaccharide-induced fever 225
Lithium-treated rabbits 694
Lithium clearance 74
Lung epithelium 62
Lung inflation 580

Lymph node capsule 667
– – contractility 667

M

Madin-Darby canine kidney cells 526, 533, 540
Magnesium 238
Magnesium-selective microelectrode 238
Mathematical model 694
Maxi-Cl channels 413
Mechano-transduction 646
Mechanosensitive ion channels 646
Medulla 604
– oblongata 247
Medullary collecting tubules 561
Membrane blebs 758
– currents 151
– hyperpolarisation 473
– ion conductance 180
– patches 385
– potential 36, 305, 375l 501, 568
– properties 126
Mepacrine 722
Mesenteric lymph node contractility 667
Metabolic recovery 22
Methazolamide 312
Methimazole 663
Methylxanthine 462
Mg-ATP 138
Mg^{2+} 130
Microcirculation 477
Microdissection 519
Micropuncture experimentation 74
Microscopic fluorometry 715
Miniature end-plate potential 126
Mitochondria-rich cells 53
Monolayer 554
Monolayers 624
Monovalent cations 750
Multiple-conductance chloride channel 413
Multiple conductance states 454
Muscarinic 36
– K^+ channel 216
– receptors 561
Muscimol 454
Muscle 22, 296
– fibre 501
– fibers 679
Myelinated nerve 750
Myocardial ischemia 434
Myocardium 434
Myofibrillar H^+ sensitivity 501
Myoplasmic free Ca^{2+} 406
Myosin heavy-chain isoforms 689
– heavy chain I and IIa isoforms 470
– light-chain isoforms 689
– phosphorylation 512
Myothermic 406

N

Na-H exchange 88
Na transport 573
Na^+ ions 612
Na^+channel current 62
Na^+ channels 493
Na^+ conductance 254, 481
Na^+ current 594
$Na^+Cl^-K^+$ cotransporter 262
Na^+/H^+ exchange 68, 533, 615
Na^+/H^+ exchanger 270, 715
Na^+, K^+-pump activity 766
Na/K-ATPase 335
Na:K selectivity 481
Na/Mg exchange mechanism 238
Naphthalenesulfonamides 36
Neostriatal neurones 594
Nephron segments 80
Nerve-growth-factor 368
Neuroblastoma 130
– cells 393
– IMR32 cells 170
Neuronal models of temperature regulation 428
Neurones 473
Neurons 170
Neuropeptide Phe-Met-Arg-Phe-NH_2 (FMRFamide) 612
Nicardipine 586
Ni^{2+} 130
Nicotinic acetylcholine receptors 385, 586
Nifedipine 98, 151
Nigericin/NH_4Cl technique 68
5-Nitro-2(3-phenylpropylamino)-benzoic acid 262
Node of Ranvier 162, 750
Noise analysis 62
Non-selective cation channel 609
Non-xanthine inhibitors of phosphodiesterase 462
Nordihydroguaiaretic acid 722
Norepinephrine 727
NPPB 312
Nucleoside diphosphate kinase 213
Nucleus paragigantocellularis lateralis (PGL) 222
Nystatin 481

O

17β-oestradiol 659
Oestradiol treatment 659
OK cells 554
Omeprazole 540
Ontogenesis 519
Oocytes 1, 7
Open probability 493, 766
Opening and closing rates 360
Opossum kidney cells 138
Optical depth control 94
Oscillations 43
Osmolyte transport 573
Osmotically compressed muscle fibers 679
Osteoblast-like cells 646
Ouabain 88, 126, 262, 639
Outward current 130
Oxidant chloramine-T 393
Oxidative phosphorylation 22

P

Pacemaker activity 201
Pancreatic B-cells 568
– duct cells 652
Papillary muscle 219, 406
Paracellular route 533
Parasympathetic neurones 322
Parathyroid hormone 254, 615, 624
Patch clamp 43, 98, 120, 138, 170, 189, 281, 305, 347, 368, 393, 398, 413, 448, 493, 586, 594
– – technique 758
PC12 Cell 368
P_2-purinostimulation 189
PCO_2 632
Perfusing pipettes 347
Periaqueductal grey matter (dPAG) 222
Permeant support 554
Permeation properties 609
pH-sensitive dye 615
– fluorescent dye (BCECF) 68
pH in slices 247
pH regulation 715
pH_i recovery 615
Phentolamine 667
Phenylalanine 722
Phobol ester 351
Phosphate transport 554, 624
Phosphodiesterase 462
Phosphoinositide turnover 189
Phrenic nerve responses 580
Physical activity 470
Pinacidil 305
Pipette perfusion 347
Pirenzepine 561
Piretanide 262
Pituitary 120
Planar bilayers 360
Plasma volume 548
Platelets 68
PO_4-transport 554
Polarity 624
Portal vein 467
Postsynaptic potentials 375
Potassium 481, 632, 639
Potassium channels 43, 162, 393, 422
– conductance 481
– deficiency 74
– transport 180
–/hydrogen adenosine triphosphatase 639
Potentiometric dye NK-2367 288
Pressure-flow relationship 442
Primary culture 270
Principal cells, renal 88
Procaine 53
Propranolol 667
Prostaglandin E_1 526
– I_2 305
Protein kinase A 615
– – C 1, 7, 615, 7412
Proximal cells of frog kidney 448
– convoluted tubule 270
Pulmonary stretch receptors 580
Purinergic stimulation 189

Q

Quinidine 151, 262

R

ras 120
Rat skeletal muscle 98
Receptor-evoked Ca^{2+} influx 43
Recovery from inactivation 467
Rectal colon 573
Rectification 766
Regulatory volume decrease 262, 710

Renal (A6) epithelium 481
– epithelia 554
– epithelial cell line 615
– function 74
– medulla 180, 715
– phosphate transport 624
– plasma membranes 80
– proximal tubules 722
– sympathetic activity 225
– tissue culture 481
– tubules 270
Renin activity 548
– secretion 281
Reoxygenation 144
Repolarization 162
Respiratory acidosis 632
– neurons 375
Resting heat rate 406
Rostral ventrolateral medulla 477
Rostroventrolateral medulla 735
Rubidium uptake 335
Ruptured fibers 296
Ryanodine 106

S

Salivary 36
– epithelial cell line 36
Sarcomere geometry 113
Sarcoplasmic reticulum 296
Saxitoxin 750
Secondary hyperaldosteronism 639
Secretagogue effects 652
Secretin 652
Sensory interactions 580
Serotonergic modulation 222
– response 7
Serotonin 7
Short-circuit current 62, 481
Single-cell recording 94
Single-nephron glomerular filtration rate 548
Single channel conductance 766
– Na^+ channels 493
– skeletal muscle fibre 501
– tubules 80
– ventricular myocytes 230
Sinus venosus 339
SITS 68, 312
Skeletal muscle 17, 106, 113, 238, 288, 296, 470, 689, 758
– – C-2 cells 586
– – Ca^{2+} currents 210
– – fibres 126
Skinned fibers 296
– smooth muscle 512
Slow inward current 322
– outward current 322
Smooth muscle 28, 351, 462, 512, 667, 742
– – cells 151, 467
Sodium 481
– channel 120, 162, 594
– – gating 360
Sodium channels 750
– current inhibition 398
– – kinetics 594
– entry 88
– nitroprusside 519
– transport 180
Solution exchange 347
Spinal cord temperature 428
– serotonin nerves 604
Spironolactone 62
SR calcium release 106
Stretch-activated channels 448
Stretch-activation 646
Subconductance states 413, 454
Substantia nigra neurones 473
Succinate 434
Sugar uptake and phosphorylation 673
Suprapontine mechanisms 580
Surface charge 360
Sympathetic activity 735
– nervous system 225
Sympathoexcitatory neurones 477, 735

T

T-system 288
T lymphocytes 413
Temperature dependency, after potential 288
– regulation 94
– signal 428
Tension 501
Tetracaine 106
Tetraethylammonium 568
– blockade 704
– ion sensitivity 704
Tetrahydroaminoacridine 130
Tetrodotoxin 120, 151, 398, 667, 750
Thermogenesis 659, 663
Thimerosal 305
Thiopental 375
THIP 454
Thrombin 68
Thyrotropin-releasing hormone 704
Tolbutamide 473
Tracheal smooth muscle 351
– – – cell 151
Training 470
Transfection 120
Transient K^+-current 467
Transmural voltage 254
Transport inhibition 624
Tubuloglomerular feedback 548
Tumor necrosis factor 225

U

Underperfusion 434
Urinary bladder 322
Urine concentration 694

V

Vagus nerve 580
Vascular endothelial cells 609
– smooth muscle 727, 742
– – – cells 467
Vasoactive intestinal peptide (VIP) 80
Vasopressin 694
Ventilatory control 580
Ventral medulla oblongata 247
Ventricular myocardium 398
– myocytes 230
– works 442
Ventrolateral medulla 222, 477, 604
Vertebral artery perfusion 735
Vestibular dark cells 262
Viability of cultures 201
Video microscopy 270
Visceral smooth muscle 28
Voltage-activated anion conductance 53
Voltage-dependent gating 360
Voltage-operated calcium channels 281
Voltage clamp 106, 130, 586
– dependence 162, 448

W

Whole cell recording 467
Window current 594

X

Xenopus oocytes 1, 7
